PROFESSIONAL EXPERIENCE

Product Support Specialist, Passport Inc. (2017 – Present)
Charlotte, NC
- Provided comprehensive support to municipal and private label clients for any and all problems related to the product. Worked closely with development to identify and debug any systems flaws and help configure new revisions to application features. Worked across three separate product platforms and helped to build out version one of various product documentation for client and company usage.

Account Manager, YP Marketing Solutions (2015 – 2016)
Charlotte, NC
- Developed effective digital marketing strategies that improve existing client relationships and generate new business leads through SEO/SEM best practices. Showed successful campaign management for multiple markets and verticals utilizing effective time-management skills and sound digital market strategies.

PERSONAL VENTURES

Space Balls: A Multiplayer Arena Game (2016)
Atlanta, GA
- Developed a full stack multiplayer capture the flag game that uses web sockets and the NodeJS-based game physics library PhaserJS. Features custom lobby for team assignment and log in ability using AngularJS. Project is in version 1.0 currently, with development on version 2.0 including a centralized physics management system and replacement of Phaser with P2.

Fresh Kicks: An E-commerce Site (2016)
Atlanta, GA
- Developed online store that showcases three new shoes weekly exhibiting the latest in trends, style and design. Implemented technologies include AngularJS, NodeJS, Express, and MongoDB with fully functioning payment system using Stripe. Intended for the casual shopper and the footwear enthusiast.
