PROFESSIONAL EXPERIENCE

Web Developer (2016 – Present)
Charlotte, NC
• Designed, developed and implemented full web applications for small businesses in the service retail industry. Projects ranged from single-page layouts to full stack web applications employing RESTful APIs, comprehensive databases and custom administrator portals. Followed modern design patterns and UI/UX best practices. Current projects include Carolina Tap Solutions and Twenty-Two Art Bar.

Account Manager, YP Marketing Solutions (2015 – 2016)
Charlotte, NC
• Responsible for developing effective digital marketing strategies that improve existing client relationships and generate new business leads through SEO/SEM best practices. Showed successful campaign management for multiple markets and verticals utilizing effective time-management skills and sound digital market strategies.

PERSONAL VENTURES

Space Balls: A Multiplayer Arena Game (2016)
Atlanta, GA
• Developed a full stack multiplayer capture the flag game that uses real-time software using web sockets and the NodeJS-based game physics library PhaserJS. Features custom lobby for team assignment and log in ability using AngularJS. Project is in version 1.0 currently with development on version 2 including a centralized physics management system and replacement of Phaser with P2.

Fresh Kicks: An E-commerce Site (2016)
Atlanta, GA
• Online store that showcases three new shoes weekly exhibiting the best and latest in style and design. Implemented technologies include AngularJS, NodeJS, Express, and MongoDB with fully functioning payment system using Stripe. Intended for the casual shopper and the footwear enthusiast.
